

The scatter plot of players rankings in Player Efficiency Rating and in estimations from SGD (for the NBA season 2018–19)

The blue solid line has the equation $PER = SGD$, the black dash line shown above and below of the solid line has the equation $PER = 30 + SGD$ and $PER = -30 + SGD$ respectively.

A player marked green indicates that the difference between his SGD ranking and PER ranking is less than 30. If the player marked red then indicates that the difference is more than 30.
